## ERRATA SHEET

### *Mason County Shoreline Restoration Plan, dated April 2013*

Information provided in this Errata Sheet is intended to correct information provided in the April 2013 “Restoration Plan” prepared for Mason County’s Shoreline Master Program update by Environmental Science Associates (ESA), Coastal Geologic Services, and Herrera Environmental.

---

#### Revision #1

Part 3.0 (fourth paragraph) excludes lands within tribal ownership or in tribal trust, however part 4.2 (second paragraph) states, “Site-specific restoration opportunities were restricted to publicly owned shorelines and tribal lands.” The following change represents the clarified language:

The portion of WRIA 21 within Mason County is located entirely within federal land (Olympic National Park) and is not discussed further in this report. ~~Also, lands within tribal ownership or in tribal trust, for example those owned by the Squaxin Island Tribe, are not governed by the County’s SMP and are not included in this plan, however~~ restoration projects on those lands may be included in this plan.

---

#### Revision #2

Part 5.3.2 (second paragraph) states that there is no comprehensive assessment tool for South Puget Sound, which is in error. The following change represents the corrected language:

Many restoration opportunities in South Puget Sound were identified in the Lead Entity (Mason County Conservation District) three-year plan and the Habitat Work Schedule. Also, the WRIA 14 technical team produced the Nearshore Project Selection Tool (NPST) which spatially mapped the entire South Sound shorelines and prioritized High Priority shorezone units for restoration and preservation for juvenile salmonids. ~~The nearshore areas of South Puget Sound are the subject of considerable restoration focus; however, no single comprehensive restoration assessment has been conducted.~~ Restoration actions are commonly led by the Mason County Conservation District, South Puget Sound Salmon Enhancement Group, and the Squaxin Island Tribe.

However, where the Restoration Plan states that there is no comprehensive assessment tool for the *entire* County, it is correct.

---

#### Revision #3

Table 5-3 contains restoration project “MR-32 Walker Boat Ramp Removal (Opportunity # 65)”, which was completed before Mason County has adopted the updated Shoreline Master Program. This project should be excluded from Table 5-3.

Table 8.1 should include the South Sound Local Integrating Organization “Alliance for a Healthy South Sound” and “Northwest Indian Fisheries Commission.” The table should exclude “People for Puget Sound,” which no longer exists. In addition, the information regarding Squaxin Island Tribe’s past and ongoing projects is error in Table 8.1. The Squaxin Island Tribe does not perform work in Hood Canal watershed. The following table shows the revised language (excluding the unchanged rows).

<b>Partner Agency or Organization</b>	<b>Mission and Scope</b>	<b>Role in Future Restoration Efforts</b>	<b>Examples of Past and Ongoing Projects</b>
<u>Alliance for a Healthy South Sound (AHSS)</u> <a href="http://www.healthysouthsound.org/">http://www.healthysouthsound.org/</a>	<u>Supports coordinated and collaborative decision-making aimed at restoring and protecting the ecological and socio-economic health of South Puget Sound.</u>	<u>Responsible for Action Agenda implementation.</u>	<u>Assistance with septic repair grant and loan programs and with stormwater pollution prevention programs.</u>
<u>Northwest Indian Fisheries Commission</u> <a href="http://nwifc.org/">http://nwifc.org/</a>	<u>Assists member tribes in their role as natural resources co-managers and provides a forum for tribes to address shared natural resources management issues.</u>	<u>Provides watershed- and stock-level habitat information (SSHIAP) to assist tribal, state, and local planners in prioritizing habitat protection and restoration measures.</u>	<u>Maintains nearshore data exchange, fish distribution, and Puget Sound steelhead habitat databases. Subawards federal salmon and habitat restoration funding to tribes.</u>
<u>People for Puget Sound</u> <a href="http://www.pugetsound.org">www.pugetsound.org</a>	<u>Nonprofit organization founded in 1991 to ...</u>	<u>Community and volunteer support ...</u>	<u>1,200 miles of Puget Sound shoreline ...</u>
<u>Squaxin Island Tribe Natural Resource Department</u> <a href="http://www.squaxinisland.org">www.squaxinisland.org</a>	<u>Works to sustain and enhance tribal resources; participates in natural resources enhancement and protection programs.</u>	<u>Partner for water quality monitoring and restoration projects.</u>	<u>Worked with the state to develop TMDLs for water bodies draining to Hood Canal; completed restoration projects on Skookum Creek; developed a restoration plan for Skokomish River Chinook salmon in cooperation with WDFW. Established an EDT analytical framework for restoration and management of habitat for Goldsborough, Skookum, McLane and Johns Creek; and partnered on TMDL’s for Oakland Bay and its tributaries.</u>
