Category discrepancy explanation

VoteWA discrepancy explanation

20,174 voters credited in VoteWA, add 1 ACP received and 1 second ballot for a voter = 20,0176 ballots tabulated. A parent voted and was credited with their ballot ID (label) on son's ballot envelope. Five days later (8/7) the same parent's ballot ID was received with signature. Our sorter put it through as an "Accepted" ballot and was opened and tabulated. Spent many days searching to find the one ballot tabulated that VoteWA did not have credited. The ballot can not be removed from tabulation. Procedures have been put in place to prevent this error in the future.
