Voting Accessibility Advisory Committee

The VAAC updates the plan of outreach strategies for the Mason County Elections Department to provide accessible services to voters that are underserved and with disabilities in our community. The committee is comprised of staff from the Mason County Auditor's Office and representatives of Mason County's disabled and underserved community members, as well as community members.

To join call or visit our website.

ACCESSIBLE VOTING UNIT (AVU)

This device allows voters to vote independently and with confidence.

It has audio assistance, font control, visual color contrast, touch screen input, and input through devices like lap paddles and sip and puffs.

The unit prints the voted ballot that is then sealed in an envelope. The voter signs or makes a mark on the sealed envelope then deposits it in a ballot drop box in the same manner as other ballots

LARGE PRINT BALLOTS

Large print ballots are available upon request
